

Materials Acceptance Criteria

In order to ensure efficient operations and the proper receipt of materials at Rhode Island Resource Recovery Corporation's (Resource Recovery) facilities, the following applies to **all** accepted materials, **unless otherwise noted** under that material's specific acceptance criteria.

1. **Fees:** Refer to the current Fee Schedule at www.rirrc.org/about/accepted-materials-pricing for pricing.
2. **Customer Load Types:** The following customers can deliver accepted materials without an appointment during normal operating hours (www.rirrc.org/about/location-hours), unless otherwise noted:
 - a. **Individual Resident Loads:** Typically arriving in a car or pickup truck with small quantities of materials
 - b. **Small Contractor Loads:** Small contractors typically arriving in a pickup truck, small dump truck, box truck, etc., with small quantities of materials
 - c. **Municipal and Commercial Customer Loads:** Municipal and commercial customers typically arriving in large collection vehicles (e.g. rear load, front load, side load, etc.) or delivering a roll off
3. **Load Delivery:** All customers delivering loads must stop at the Scalehouse. The Weighmaster will direct the customer to the applicable area in our facility such as the Residential Recycling Area, Small Vehicle Transfer Station, Central Landfill, Materials Recycling Facility (MRF), Compost Operation, or other areas.
4. **Material Segregation:** Materials must arrive segregated, or upon arrival be segregated by the customer, according to the acceptance criteria for each individual material type listed in this document. Materials of different types delivered in mixed waste loads and not segregated by the customer upon arrival may be subject to rejection or accepted and charged in accordance with the current Fee Schedule (e.g. if your load contains recyclables and solid waste, the entire load will be charged at the higher rate).
5. **Acceptable Items & Preparation:** Loads must only contain acceptable items and be prepared as defined under each specific material.
6. **Contaminants:** Loads containing more than 10% (unless otherwise specified under a specific material) by weight or volume of contaminants as defined under a specific material's acceptance criteria will be subject to a disposal fee and any equipment and/or rejection charges.
7. **Prohibited Items:** Loads containing any percentage of **prohibited** items as listed under a specific material's acceptance criteria are subject to any of the following: immediate rejection, a disposal fee, equipment and/or rejection charges. Out-of-state waste, regulated hazardous waste, and regulated medical waste are banned from any type of acceptance at Resource Recovery. Televisions, computers (including monitors, computer towers, laptops and tablets), and mercury-added products are banned from landfill disposal.
8. **Difficult to Manage Loads:** A Load Handling Surcharge will apply to loads of materials such as dust, string, yarn, stumps, poles/beams greater than 4' in length, foam for landfilling, etc., that require extra or special handling for proper landfill disposal such as excavating a hole for placement or watering to contain dust, etc. This does not apply to materials accepted for a separate fee such as fish waste, sludge, etc. Call the Scalehouse at 401-228-3102 to help determine if your load may be difficult to manage.
9. **Local pick-up/drop-off or disposal options outside of Resource Recovery:** Visit <http://atoz.rirrc.org>.

 - b. The container or inner liner has been cleaned by another method that has been shown in the scientific literature, or by tests conducted by the generator, to achieve equivalent removal; OR
 - c. In the case of a container, the inner liner that prevented contact of the commercial chemical product or manufacturing chemical intermediate with the container has been removed

Additionally, Resource Recovery requires that:

1. The tops of the containers are removed or a hole is cut into the container or drum large enough to allow a representative of Resource Recovery to safely inspect the inside to ensure "RCRA EMPTY."

Mixed Recycling

Permitted Customers & Delivery Requirements: All customers. All acceptable mixed recycling materials can arrive mixed together.

1. **Individual Residents and Small Contractors** must deliver to the Residential Recycling Area.
2. **Municipal and Commercial Customers** must deliver loads to the MRF.

Preparation: Resource Recovery expects customers to treat unprocessed comingled recyclables as a commodity during collection and delivery to the MRF to allow for proper sortation when processed through the MRF. Materials received in a condition inconsistent with the **moisture** and **compaction** standards below, or otherwise found objectionable by Resource Recovery staff, may be rejected as these issues contribute to cross-contamination, loss of quality recyclables, processing inefficiencies and higher residue rates. Rejected loads will be recoded as solid waste and the customer will be subject to the appropriate fee and other surcharges including equipment usage fees.

Excessive Moisture: Customers shall ensure that recyclables are delivered to the MRF free of excess moisture. Loads that are determined to be too wet or contain an excessive amount of snow, ice or frozen material to process shall be subject to rejection. Such determination shall be made by Resource Recovery and shall be binding.

Excessive Compaction: While balancing the utilization of the hauling vehicle's maximum load capacity, the customer shall prevent the excessive compaction of material to be delivered to the MRF. Loads that have been subject to excessive compaction cannot be sorted properly causing excess residue and/or contamination. Resource Recovery recommends a 2.5:1 maximum compaction ratio to reduce MRF residue and preserve commodity values. Using data from the 2016 EPA Volume to Weight conversion table, single family comingled recyclables average 126 pounds per cubic yard (e.g. a vehicle with 30 yards capacity should not exceed 5 tons of residential single stream material). Loads that are found to be excessively compacted and unsuitable for processing may be subject to rejection. Such determination shall be made by Resource Recovery and shall be binding.

No Bagging/Bundling: All materials must arrive loose (i.e. not be in plastic bags, leaf and lawn bags, cardboard boxes or bundled together). Materials received in bags will be treated as solid waste and disposed of as residue regardless of the recyclability of the items within the bags.

Acceptable: Materials must be (1) commingled plastic, glass, metal, and paper/cardboard items that follow the acceptance criteria outlined below, by material type, (2) dedicated loads of acceptable material types, (dedicated loads of glass may be accepted with advance notice and permission from RIRRC), (3) no more than 50% glass by weight in any mixed load, (4) free from excessive moisture, (5) loose, and (6) free from excessive compaction.
